Global Presence
The ISGlobal network abroad

- Countries where ISGlobal coordinates projects and networks
- Long-term strategic alliances
- Main international institutions with which ISGlobal published scientific articles during 2020

United against a common threat
Annual Report ISGlobal 2020

Read the 2020 Annual Report at 2020.isglobal.org

A partnership of: "la Caixa" Foundation
Highlights
The work that set the tone for 2020

Growing Up in the City
In a series of papers published in 2020, we show that exposure to the urban environment raises the risk of childhood obesity and high blood pressure.

Translation: Now More than Ever
Rigorous, concise and timely information acquires an estimable value when facing a health crisis like the one caused by COVID-19 in 2020.

From Particles to Viruses
A special issue was dedicated to SHAMISEN, a project that reviewed lessons from past nuclear accidents and developed recommendations that are easily applicable to the COVID-19 pandemic.

Of Cancer and Men
The loss of function in genes on the Y chromosome increases the risk of cancer in men.

Cause of Death?
A study led by ISGlobal highlights the need to improve the quality and performance of current verbal autopsy techniques.

Adapting to the Biggest Threat of All
The EARLY-ADAPT project, funded by an ERC Consolidator Grant, will investigate how European populations are adapting to the public health challenges triggered by climate change.

B + C = 0
On World Hepatitis Day 2020, ISGlobal launched two major projects aimed at advancing towards the elimination of viral hepatitis in Spain.

Protection Predictions
Certain factors and markers could help predict how well someone will respond to vaccination.

Going High with Ivermectin
A large review and analysis of available data provides evidence of ivermectin's safety at higher doses than those currently recommended. This information paves the way to expanding its use against other diseases.

An Award-Winning Study on a Life-Saving Plan
The Elsevier Atlas Award went to our study on the health impact of implementing the superblock model in Barcelona: close to 700 lives saved every year.

All for One
The three pillars of our institution have come together with one common goal: contribute to the COVID-19 response.

B + C = 0
On World Hepatitis Day 2020, ISGlobal launched two major projects aimed at advancing towards the elimination of viral hepatitis in Spain.

Our Organisation

Total Number of Staff
469
Total Number of Students Trained
336
Women
70%
Men
30%

Knowledge Creation & Transfer

Total Number of Publications
498
56% were DI publications

Knowledge Transmission

Total Outreach Activities
52
27 Policy Briefs

Knowledge Application & Dissemination

Media Impacts
12,360
